Ryann Lacks

Pullman, WA | (253)-254-9273
ryannlacks@gmail.com

Summary

Project Manager with a strong technical foundation in computer science and data analytics. Experienced supporting software and engineering teams through project planning, workflow analysis, milestone tracking, and stakeholder communication. Proven ability to translate technical data into actionable insights, support cost and schedule tracking, and improve delivery visibility using Jira, Confluence, Python, and Power BI.

Education

Washington State University | Pullman, WA
Bachelor of Science in Computer Science | 05/2026
Minor: Mathematics

GPA: 3.62 | President's Honor Roll (Fall 2022–Current)

Relevant Coursework: Database Systems, Data Structures, Software Engineering, Applied Statistics

Skills

Jira, Confluence, Power BI, SQL, C++, Python, Earned Value Management (EVM), Project / Program Management, Software Engineering & Analytics, User Acceptance Testing / System Testing, Microsoft Excel, Risk Assessment, Cross-Functional Collaboration

Projects

Capstone Project — Full-Stack Web Application
React, MongoDB, CSS

- Defined project scope, milestones, and feature priorities in collaboration with teammates.
- Translated requirements into technical tasks and tracked progress through development and testing phases.
- Made trade-offs around usability, performance, and data structure based on client constraints and user needs.

Experience

Schweitzer Engineering Laboratories | WA, Pullman
Project Management Intern | 07/2024 - Present

- Analyzed workflows across 3–5 engineering workstreams, reviewing 100+ Jira tasks to identify tracking gaps, dependency risks, and schedule visibility issues, supporting on-time milestone delivery.
- Developed Python automation tools that reduced manual reporting time by 80–90%, improving lead-time tracking accuracy for backlog managers.
- Standardized project documentation and reporting structures, improving data clarity and reducing bottlenecks by ~25%.
- Coordinated with engineers, PMs, and analytics stakeholders (10+ contributors) to align tools and processes, supporting consistent project execution in a high-demand environment.
- Supported EVM tracking for active projects by monitoring PV, EV, and AC across multiple reporting cycles, enabling early identification of cost and schedule variances.
- Designed and maintained Power BI dashboards to visualize project status, workload distribution, and key performance indicators, enabling managers to quickly assess project health and prioritize actions.

Activities

Washington State University Dance Team - Varsity Student Athlete | 2022-2026

- Selected through a recruitment and audition process. Competed at annual national competition and supported all home football and basketball games.

- Committed 10-15 hours a week while maintaining a full academic course load and internship.
- Collaborated with 20+ teammates to deliver coordinated performances under fixed deadlines.
- Demonstrated discipline, adaptability, and communication in fast-paced, high-expectation environment.
